REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claim one is the only independent claim and it was found to be allowable because the prior art did not show or suggest: a stop control unit for performing a stop control by supplying fuel into a combustion chamber of cylinder which is in a compression stroke and/or in an expansion stroke at a time of stopping the engine; an unburned fuel discharge preventing unit for preventing discharge of the fuel when it is estimated that the fuel in the combustion chamber of the cylinder is discharged in an unburned state, at a time of the stop control of the engine; a combusting unit for combusting, at a time of starting the engine, the fuel supplied to the combustion chamber of the cylinder; and a starting unit for starting the engine by utilizing , combustion pressure obtained from the combusting unit and/or a motor. All other claims contain the above limitation and are therefore allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

2. Claims 1-12 are allowed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited are systems that control the stopping of engine to aid in the starting process.
